Mission Statement of Columbia Surgery Center

It is the mission of Columbia Surgery Center to provide the highest quality standard of obstetrical and gynecological women's health care.

The physician, physician-assistants, nurse practitioners, nursing staff, and business personnel are devoted to achieving excellence in OB-GYN women's health care.

It is our opinion that this can best be achieved through our core values of professional competence in all facets of OB-GYN health care delivery; deliberate attention to patient dignity and sensitivity; and, the maintenance of the highest standards of personal integrity.

We believe in the importance of maintaining a healthy, warm environment for all people with whom we come in contact; whether it be employee or patient.

Moreover, Columbia Surgery Center endeavors to meet the physical, emotional, and educational needs of all those who seek our services with the expectation that such empowerment will assist them in making informed decisions about their health-care and life-long wellness.
